

School is a place of business - the important business of learning. School supplies are the tools of learning. As with any task, having the correct tools makes it easier to efficiently make a quality product.

Please review these guidelines for school supplies needed by each student on the first day of school. Take advantage of store sales, but don't let promotional gimmicks take advantage of you, by encouraging you to buy "data files" or other unnecessary items for your elementary student. These are often more of a distraction than a tool. *Remember*, it's hard to improve on the basic tools. Stick to the basics.
